Company Snapshot

Type	Certified service-disabled veteran-owned small business (SDVO SB)
HQ	8280 Willow Oaks Corporate Drive, Suite 600, Fairfax, VA 22031
Focus	Federal and commercial IT modernization, cybersecurity, cloud, identity, AI-enabled automation, documentation, and program delivery
NAICS	541511, 541512, 541513, 541519, 541614, 541990, 511210, 518210

Core Capabilities

Identity, PKI, ICAM & Zero Trust

Identity modernization, access control, authentication strategy, PKI planning, and Zero Trust alignment.

Cybersecurity & Compliance Modernization

Secure architecture, compliance readiness, production-network hardening, CDM support, and cyber program execution.

Cloud & Infrastructure Modernization

Hybrid cloud, Azure/AWS readiness, virtualization, remote access, network architecture, and modernization roadmaps.

Enterprise Architecture, PMO & Program Rescue

Architecture documentation, stakeholder alignment, governance, executive reporting, project recovery, and technical advisory.

AI Implementation, Automation & Documentation Frameworks

Practical Artificial Intelligence workflows for SOPs, knowledge management, proposal support, compliance documentation, and operational automation.

Featured Offer

SevenTek AI Documentation Factory

Turn scattered procedures, meeting notes, policies, technical knowledge, and proposal content into structured SOP libraries, executive summaries, compliance narratives, decision records, and AI-assisted documentation workflows.

Ideal Entry Points

- AI documentation, SOP modernization, or knowledge-base sprint
- Identity, PKI, ICAM, or Zero Trust roadmap
- Cybersecurity compliance, risk reduction, and CDM support
- Cloud, remote-access, or infrastructure modernization assessment
- Program rescue, PMO support, or architecture documentation
- Commercial IT modernization, automation, and advisory engagement

Federal & Commercial Value Proposition

SevenTek helps federal agencies, government contractors, and commercial organizations modernize secure infrastructure, strengthen identity systems, implement practical Artificial Intelligence (AI), and restore disciplined execution to complex IT programs.

Evidence & Past Performance Signals

- Supported federal agencies with cybersecurity services for critical federal workloads and secure production-network operations.
- SevenTek support helped federal agencies achieve Continuous Diagnostics and Mitigation (CDM) program compliance.
- SevenTek staff have been recognized for exceptional cybersecurity performance in the federal space, including a federal agency Commissioner's Award for Excellence.
- Experience spans cloud, virtualization, network/remote access, software development, SDLC, DME, O&M, and agile delivery.

Differentiators

Veteran-led execution

Marine Corps discipline applied to enterprise modernization, risk management, and mission-focused delivery.

Senior technical leadership

Certified project management and CIO-level leadership education with deep infrastructure, cyber, and cloud experience.

Outcome-driven modernization

Focus on operational results, architecture alignment, compliance readiness, and handoff to client teams.

Practical AI adoption

AI implementation tied to documentation, automation, governance, proposal support, and knowledge operations - not hype.

Leadership

Founded by Miguel Funes, a U.S. Marine veteran with 17+ years of operational planning, strategy development, management, and public/private-sector technology experience. Miguel is a certified project manager, certified chief information officer, and holds graduate and undergraduate degrees from George Mason University.

Commercial Engagement Models

- Fixed-price AI documentation and automation sprints
- Cybersecurity and compliance modernization engagements
- Cloud, infrastructure, and remote-access assessments with implementation support
- Fractional CIO, CTO, enterprise architecture, and technical advisory support
- PMO, program rescue, process improvement, and operational documentation support
- Commercial managed IT modernization and knowledge-base support
